Is Length of Throwing Stride Important?

Coaching experts figure that throwing is the hardest of all baseball skills to learn and also one in which the average person can stand the most improvement. One of the most important factors which controls the efficiency of your throw is the length of your throwing stride.

Actually the stride forward you take from your "ready to throw" position, when throwing a ball, is similar to, and as important as, the small stride you use when you step forward from your "ready to hit" position to make your swing. Your feet are already slightly apart as the ball is gathered. The important thing to remember is that you should take the same length of stride every time. If you don't you will be inaccurate and wide.

The ideal throwing stride is about 6 to 8 inches long, so check on the length of your throwing stride and see how close you are to this ideal length. Also have someone check your length to see if you take a different length of stride each time you throw. To develop an even stride, place a target on the ground 6 or 8 inches in front of you and throw a ball back and forth with a friend, trying to hit this target each time you step forward and throw.

This sort of drill will soon get your stride into the proper groove. When you stride be sure your toes are pointing straight at the target and

not off to one side. Remember, a controlled throwing stride will help you tremendously in developing an accurate throw and there is nothing that will help improve your game more than this.

Build Up for Next Track Season

Yes, the next few months can mean the difference between a mediocre year in track for you and a year filled with success and many records.

Bob Richards the 1952 Olympic Games pole vault winner and record breaker uses the following few months to build himself up by weight training for the coming season. To get a complete breakdown on just how to go about strengthening that body of yours send in 25c for a copy of the first edition of the Research Guide.

Not Enough Coaches

One of the great problems confronting young Canadian athletes is the lack of coaching.

The way to overcome this is to work out an arrangement with a friend who is also keen to become an athlete, he coaching you and you helping him.

This self-coaching system is a lot of fun and after awhile you will find that both you and your friend will become really good at finding mistakes, making suggestions and so on. Perhaps you will even discover you have a real talent for coaching. Another interesting point is this, by coaching others you learn a lot yourself. By telling him the right way to do things you impress these correct habits of play on your own mind. If you both work hard you can accomplish big things.

Don't forget that among other things, membership in Sports College entitles you to get its literature, consisting of bulletins and booklets considered by experts the world over to be the best material of its kind ever compiled. So take advantage of this and join now. To join, send a letter to: Sports College, Box 99, Toronto 1, Ontario, and say you would like to become a member.

—Central Press Canadian.

BOY SAYS HE SLEPT WITH "WHITE BEAR" WHILE LOST IN BUSH — David Deugo, age three, spent 18 hours alone in the Muskoka, Ont., bush, where he slept "with a big white bear that didn't bite," ate quarts of blueberries and "took his shoes off to go to bed." He was found by a search party, barefooted and singing to himself, five miles deep in the bush. His parents, Mr. and Mrs. Roy Deugo of Weston, Ont., were beginning to fear he would never be found alive, but when they saw him demolish this man-sized meal they concluded he was very much alive. The "white bear" is believed to be a cow or dog.

Left Eyed Children Have An Advantage

MONTREAL.—It's an advantage to children to be "left-eyed".

That's what Lawrence Dayhaw, Professor of psychology at the University of Ottawa, said here.

Speaking to Montreal's Richelieu Club, he said medical opinion is that children tend to be either "left-eyed" or "right-eyed".

Because reading as we do it is from left to right "left-eyed" children have a better chance than the other kind of saving their sight, he said.

HOW THEY DO IT

Spiders can walk over their own webs because they coat their legs with an oily substance from their mouths.

This Curious World

By William Ferguson

PRISCILLA'S POP—The Losing Fight

—By Al Vermeer

FIRST AID

First Aid is just what the two words imply, namely the earliest possible intelligent aid or help given to the victim of an accident or sudden illness. This aid is usually of a temporary nature only, to be given at once, at the scene of the accident or sudden illness and before a doctor is available to assume responsibility.

ILLNESS CAUSED BY EXCESSIVE HEAT

Prolonged exposure to excessive heat frequently results in one of the following conditions: Sun Stroke or Heat Stroke; Heat Exhaustion or Heat Cramps.

Prevention

Normally, there is a definite balance between heat production and heat loss in the body.

When a person works in a high temperature, sweating is the chief means of keeping the body cool. Sweating not only removes water but also large quantities of salt from the

body. These must be replaced by drinking the necessary amount of water, and by taking extra salt.

Industries employing men working in a hot place supply salt tablets (5 to 10 grs) close to the drinking water supply. One or two tablets are taken with each cup of water.

Clothing

Sweat cools the body as it evaporates. When working in excessively high temperatures, loose thin clothing should be worn, and the less clothing the better. Exposure to air currents from fans or open windows assists the evaporation.

To reduce the production of body heat, eat lightly and of easily digested foods. If necessary to work during the hot period of a day, do so in short periods, alternate with rest periods. This should be particularly so during the first few days of exposure to unusual heat. A tolerance may be developed.

Avoid exposure to the direct rays of the sun. Keep the head covered, take small amounts of fluids frequently, but avoid alcohol, iced tea or iced coffee.

The ancient Egyptian scarab is an image of the once-sacred dung beetle which was revered as a type of the sun god.

Kitchen Meditations

By JANE DALE

FAMILIAR FACES

Familiar faces are beautiful faces. Though perfection may have passed them by. The marks of living; so much taking and giving. May have set the features somewhat awry.

Familiar faces are beautiful faces. Our eyes light up when we chance to see. A remembered face in some outlandish place. Where nothing but strangers there seemed to be.

Oh, yes, those faces are beautiful faces. And we treasure each one though we know not why. We read each story; the defeat and glory.

In familiar faces as they draw nigh. Familiar faces are beautiful faces. As far away over the world we roam. When memory brings on swiftest wings.

The remembered faces of those at home.

Answer To Last Week's Puzzle

World Happenings Briefly Told

The Otis Elevator Company in Yonkers, N.Y., has opened a new 180-car parking lot for its employees. Close to the gate is a "ladies' row." It has an extra-wide aisle.

A War Office announcement said the Queen has approved appointment of the Queen Mother as honorary colonel-in-chief of the Rough Riders, a City of London reserve regiment.

A 70-year-old shepherd in Kaver, South Africa, was attacked by an eagle when he tried to protect his flock from the swooping bird. Fending off the eagle's talons, he beat it to death with a whip.

Ian Wallace, pilot of Britain's 500-mile-an-hour Comet jet airliner, won a competition at a dance in Cowes, Isle of Wight. The prize? A flip around the south coast English island in a piston-engined biplane.

Smokers' carelessness was responsible for more fires in Saskatchewan in 1951 than any other cause, resulting in 372 outbreaks with damage of \$170,000, the provincial fire commissioner's office reported.

Norway is trading furs for prunes from United States. Norway's entire stock of unsold furs—100,000 pelts—is being sent to United States under a barter arrangement. Norway will receive 6,000 tons of prunes in exchange for the furs.

Will Ask For More Time To Finish Highway

VICTORIA, B.C.—British Columbia can not possibly complete its portion of the Trans-Canada Highway by the target date of 1956, it was reported here.

Public Works Minister A. P. Gaggard is expected to go to Ottawa shortly to ask for an extension of the deadline.

British Columbia has barely started on its 600-mile section of the highway, which is mostly through rough terrain.

The original agreement with the federal government called for completion in seven years and at a cost of about \$40,000,000.

Now the cost is estimated between \$80,000,000 and \$90,000,000 and the job is expected to take two or three more years than originally planned.

The route of the highway winds through country that has no comparison in any other province.

The Fraser canyon section, coming from the interior to the coast cost \$1,000,000 a mile in some cases.

In the Big Bend country near the Alberta border, it would cost \$1,500,000 to repair a highway that would probably only be used for a short time.

Cattle Rustling Once Again Hits District In Quebec

QUEBEC. — Cattle rustling with the gusto of a Hollywood western pitted against the conveniences of modern science has again hit the Quebec City district.

Lucien Roy, a farmer at St. Charles, awoke one morning to find several hundred dollars worth of fattened cows missing from his pasture. It was the same story next day for Farmer Caron of Laurierville.

Farmers near Laval each reported losses of more than \$500 in cows, heifers and sheep.

Posses organized to search for the rustlers are a far cry from the garb and mode of Hollywood. These vigilantes wear the serviceable khaki of the Quebec Provincial Police, equipped with the latest instruments in crime detection.

The rustlers apparently use trucks

to rush the cattle to large city markets.

Says Lieut. Conard Giroux, chief of detectives:

"They wait for late August when the animals are fattened for market. We've usually been able to follow their tracks to big city markets, but they're too fast for us. The cattle usually have been sold by the time we reach the late stages of investigation."

ODDITIES In The News

An empty bottle aroused the suspicion of a customs officer at London airport. Kenneth Johnson of Los Angeles told the officer he was taking back some London fog "to help fight against smog."

A curious cow landed C. Daniel Way, of Gilead, Conn., in the hospital with a fractured leg. The cow, trying to get a better view nudged Way into a mowing machine he was fixing.

Peter Dangerfield, 2½, fell 20 feet from his bedroom window in Birmingham, Eng., hit a clothes line and bounced squarely into a baby carriage. He landed on top of his four-month-old brother, but neither he nor the infant was hurt.

Residents of Elk Rapids, Mich., beat the heat on an honor system. The only ice house in town is a self-service affair. Prices are posted and a scale is provided. You step inside, select a block, weigh it and drop the money in a tin can.

Married twice, Miss Thirze Giles of Cricklade, Wilts, England, has always kept her own name. Her first husband was Dennis Giles, who died in 1940. Now she has married Reece Giles, chairman of the local parish council.

Ask Parliament To Consider Tax Injustice

OTTAWA.—W. S. Fisher of the Income Tax Appeal Board, in a judgment made public, urged Parliament to consider at its next session as apparent injustice against parents of children born in December, the last month of the taxation year.

Mr. Fisher said he had "every sympathy" for W. G. McMurray of Toronto, who appealed his 1950 income tax assessment. But the judge said that because of the present wording of the Income Tax Act he could do nothing else but dismiss the appeal.

Mr. McMurray claimed a \$400 exemption for a daughter born Dec. 25, 1950. The income tax department cut the deduction to \$150 on the ground that the child was "eligible" for family allowance payment.

The appellant's complaint — and Judge Fisher agreed — was that while a child born and registered in December is "eligible" for family allowances that month, under the Family Allowance Act the actual payment is not made until the following month.

Also, family allowances are paid only until the age of 16, so that parents of December-born children are allowed a deduction of only \$150 a year for 17 years. Parents of children born in any month get a \$150 a year deduction for 16 years and a \$400 deduction in the 17th year when the child goes off the family allowance rolls.

French bookbinders were regarded so highly during the 17th century that they were exempt from paying taxes.

Roller-Skating Rooster

Buster, whose Los Angeles owner is teaching him to be a roller-skating rooster, glides under a playmate's legs during a practice run. Buster's legs are taped to the skates. His owner, Billy Lehr, gives him a push and Buster rolls along until his momentum stops. Once in a while Buster lifts one skate as if he's almost getting the idea.

Smile Of The Week

"There are many little ways of practising economy in the home," proclaimed Mr. Wheeze to his guest, after making sure Mrs. Wheeze was out of hearing.

"So," encouraged the visitor politely.

"Yes. Last winter my wife said we must get a new sofa in the spring."

"Well—"

"Instead I got a new spring in the sofa."

Fresh water clams spend the first part of their lives as parasites of fish.

OLD CURRENCY WOULD NOT STAND HANDLING

KINGSVILLE, Tex.—Louis Munez was a rich man for a few moments. While digging post holes for a contractor he discovered a tin can filled with old-fashioned currency which has been out of circulation since 1929. As he began counting the bills, they disintegrated into tiny pieces, none larger than a thumbnail.

The annual Antarctic whale catch represents more than 500,000 tons of meat, more than all the beef exported in an average year by Argentina, the world's leading beef exporter.

Prairie Provinces Receive Increase In Tourist Traffic

REGINA.—United States tourist traffic in Saskatchewan during July, 1952, was up slightly over that in July, 1951, according to Dominion bureau of statistics figures.

The figures, received by the provincial government tourist branch and issued through the bureau of publications, indicated also that for the first seven months of 1952 there was a tourist gain of close to five per cent. over last year.

In July, 1952, some 4,055 United States cars crossed the border into Saskatchewan on traveller's vehicle permits, issued for periods longer than 48 hours.

This was a gain of 127 cars, or 3.2 per cent., over similar figures for July, 1951. Average gain for Canada as a whole for July was 2.5 per cent., with Alberta leading the percentage increase with 13.1 per cent. Manitoba's increase was 8.3 per cent.

For the first seven months of the present year, Saskatchewan's tourist traffic rose by 4.9 per cent., just under the national average of 5.4 per cent.

In this period, 10,309 United States vehicles entered under traveller's permits, compared to 9,824 in the same period of 1951. Leading in the seven-month period was Alberta, with a gain of 17.9 per cent. Manitoba was second, with an increase of 11.9 per cent.

FLOWER POT HATER TOOK HIS REVENGE

NEWPORT, Wales—The park gardener's 15-year-old assistant couldn't stand flower pots. Day after day he had to wash hundreds of them.

The final straw came when people began calling him "pot washer" when he was out with his girl.

So he raged through the potting shed and broke the stems of 328 prize chrysanthemums valued at £125.

"He must have gone berserk," pleaded his counsel, when a juvenile court fined the pot-hater £5.

::: APPETIZING RECIPES :::

Glazed Carrots with Corn Oysters make a tasty and hearty main course for meatless meals. With gardens at their peak, this is the time to serve plenty of nutritious vegetable plates!

Hearty Vegetable Dinners

IF ANY MEMBER of your family is under the impression that a meal is not complete without meat — take my word for it that you can change his mind. Because, if you serve a starchy vegetable together with a "dressed up" light vegetable, you'll find that you have a reasonable and hearty facsimile of the favorite meat-and-potato standby at a fraction of the cost!

An appetizing pair to tempt the whole family is a combination of fried eggplant and string beans in tomatoes.

Corn Oysters

One 12-ounce can kernel corn, ½ tsp. monosodium glutamate, 1 cup sifted flour, 1 tsp. baking powder, 2 eggs, separated, 1 tsp. salt, ¼ tsp. paprika, 2 tsp. sugar.

Drain corn; chop; stir in monosodium glutamate. Mix and sift flour, baking powder, salt, paprika and sugar. Separate eggs; beat egg yolks; add corn; add to dry in-

redients. Beat egg whites until stiff, fold in. Drop by teaspoons in shallow fat (1½ inches deep) heated to 375 degrees F. Fry until golden brown on both sides. Drain on absorbent paper. Makes 6 servings. Two cups cooked corn cut from cob may be used instead of canned corn kernels if desired.

Glazed Carrots

Two bunches small carrots, 1 tbsp. lemon juice, 1/3 cup sugar, ½ cup water, 1 tsp. monosodium glutamate, 1 tsp. salt, 2 tsp. butter.

Scrape carrots; cut in fourths, lengthwise; (if large carrots are used, cut more and thinner slices) place in heavy skillet. Add remaining ingredients; cover; cook over low heat, turning carrots often, until tender and glazed. Makes 6 servings.

Quick Canadian Quiz

1. Canada is touched or approached by what foreign countries or possessions?
2. From 1941 to 1951 did the area of occupied farmland in Canada increase or decrease?
3. Family allowance payments last year represented what part of total personal income tax collections?
4. To residents of what South American country does a Canadian company provide these services: transportation, telephone, gas, water, electric light and power?
5. How many privately owned radio broadcasting stations serve Canadians, how many government owned?

Body Building For Better Football

All the muscles play important roles in any game, therefore a football player like any other type of athlete, should work hard at building an all-round development. However, in football, just as in other games, there are certain muscles that are especially important.

Here are the key muscles that you should go to work on today and really build up:

The Neck: The neck gets a lot of punishment in football and so the stronger neck you have, the better it will be for you.

The Back: The back muscles, especially those that run up the back on either side of the back bone, are very important. A player with a strong back will be able to absorb the hard contact of line-plunging, tackling and blocking with less chance of injury and without tiring his body as much. A strong back also adds power to your blocking, plunging and tackling.

The Stomach Muscles and those covering your liver and kidneys: These parts of your body take quite a beating in football and should be as well protected and as well covered by strong, pliable muscles as possible.

The Legs: The important muscles in this area are the ones just above your knee on the inside of your leg and the group of muscles on the front of your thigh. These are the muscles that drive you forward into the line or into a hard, smashing tackle. The stronger they are, the better you will plunge, tackle, block and run with the ball in the open field.

These are the most important muscles to the football player. Remember, strive always for a good all-round development—it pays off in touchdowns.

Practise for Next Year

Don't stop playing baseball because your team or club is finished for the year. Instead, use these next few weeks of playing weather to practise for next year. Practise hard at improving your hitting, throwing and fielding. Test yourself in all positions. By the way, you can have a lot of fun if you and your friends get together and stage competitions to see who can throw most accurately at targets—to see who can place his hits the best, and so on. Yes, this extra practice will pay off for you in a big way—so make up your mind, to start this week.

How To Protect a Bruise While Playing

Most bruises aren't serious enough to stop you from playing but they can cause a lot of trouble if injured again before they are properly healed.

To protect these bruises while playing you should fold a good thick layer of "cotton batting" and then tape this carefully over the bruise — this will help you avoid further injury and will stop a lot of annoying pain if you do get hit on the bruise during the game. Remember, the smart athlete always takes good care of any injury—so take a tip and start doing the same!

Daring Doe

After roaming through the lawns and gardens of the Jasper Park Lodge, in Alberta, this fawn-colored doe decided to pay a personal visit to Bill Shell, who is head gardener at the famous lodge in the Canadian Rockies. And she wasn't disappointed, as the photo shows. She got a hand-out, then happily and gracefully strolled away.—Central Press Canadian.

Arizona Grain Grower To Establish Large Alfalfa Seed Farm North Of Flin Flon

FLIN FLON, Man.—A 2,000 acre farm producing registered alfalfa seed for the Canadian market is being established less than 75 miles south of Flin Flon.

Bulldozers are busy at the present time tearing out bush that covers over three sections of land on the outskirts of Wanless some 33 miles south of the 54th parallel.

When broken the land is expected to produce thousands of bushels of registered seed that will be sold at top market prices for planting in other parts of the Dominion.

The large project is being undertaken by W. Wright of Arizona.

A certified seedgrower and rancher in the United States, Mr. Wright purchased the large tract of land from several residents of Wanless last winter and is still seeking to buy further acreage for his venture.

He has established a home at Wanless and travels between the two widely separated farms by private aircraft. A landing field has been

built on his northern farm to allow him to land in his own back yard rather than motor from the field at The Pas 30 miles south.

Mr. and Mrs. Wright have been at Wanless since last July although he recently flew back to Arizona. He will return shortly.

Mr. Wright first learned of the area through the Dominion government and a year ago paid a visit to the north. He took samples of the soil at that time and had it analyzed in Arizona. According to the Wrights the soil is very rich and extremely suitable for growing alfalfa as well as other crops.

The soil was found suitable for growing certified seed a few years ago when a Nipawin farmer cultivated several acres in the area and tested its productive ability.

World Happenings Briefly Told

G. S. Lambert, Bristol, England, formerly in the Royal Army Medical Corps, always carries a first-aid kit on his bicycle. He said he helps at about four accidents a week on his travels.

Provincial crews "rat-proofing" the Alberta-Saskatchewan border area have completed the stretch from Al-sask to Empress. In some parts they were aided by club-swinging farmers.

Output of British automobiles in the first six months of 1952 was 228,052, a decrease of 16,500 from the same period last year. The export total was 2,000 lower but value was greater by £9,000,000.

Sales of new farm implements and equipment in Canada hit an all-time peak in 1951 of \$235,600,000—eight per cent. greater than the previous high of \$218,187,000 in 1950, the Bureau of Statistics reported.

A four-lane underground road will be opened at London airport soon to speed traffic from and to the airport buildings. Construction has reached the final stages on a tunnel, 2,400-feet long and 80 feet wide.

The South African government is preparing to remove beggars and tramps from the streets of Johannesburg and put them in useful work. A city social worker estimated they have been getting handouts totalling more than £5,000 a week.

Steel manufacturers have readied plans for a scrap iron drive this winter should supplies fall critically short. The Canadian scrap iron and steel committee, which represents the country's major producers and consumers, said a shortage definitely was in the making.

Weekly Tip

WATER STAINS

Remove water stains from glasses or vases by rubbing with vinegar, applied on a cloth then washing well in hot water and soap suds, rinsing with clear hot water.

Alberta's Production Of Sugar Keeps The Nation Sweet

(By The Canadian Press)

Southern Alberta is keeping a good part of the nation sweet, producing 130,000,000 pounds of refined white beet sugar annually. Sugar beet production has become a big part of Alberta's agricultural and industrial fields. Each year some 35,000 acres of farmland yield a \$7,000,000 sugar beet crop, and with the enlarging of irrigated areas production is steadily increasing.

The industry was started in southern Alberta in 1901 by Jesse Knight, who erected the Knight Sugar Company factory at Picture Butte in 1902.

First production totalled only 800,000 pounds, which could not be marketed in Alberta because of prejudice against beet sugar. The lot was sent to Winnipeg and found an immediate market, but the venture ended in 1914 when farmers decided wheat raising was more profitable.

Another company opened a factory in 1924 and later sold out to Canadian Sugar Factories Limited, which now operates three refineries within a 40-mile radius of Lethbridge. One is at Picture Butte, another at Raymond and the third at Taber. The last was completed in 1950 at a cost of \$5,000,000.

The number of growers steadily increased until now more than 1,500 farmers are harvesting more than 400,000 tons of beets annually. In 1925 the beet harvest yielded 41,500 tons. Sugar production jumped by 13 times from 1925 to more than 130,000,000 pounds expected this year.

By-products of beet sugar refining—beet molasses and wet and dry pulp—are largely used in the livestock industry. The molasses can be used to make alcohol, but more often it is mixed with beet pulp for stock feed or shipped for feeding as a livestock supplement.

Annually more than 30,000 beef cattle and 100,000 sheep are conditioned within a 20-mile radius of the factories. Cattle are put on the fields to eat the beet tops and later are

fed pulp for conditioning for market. Dried pulp, a livestock feed ranking with alfalfa hay, is shipped to the Prairie Provinces and Eastern Canada.

Beets are planted in rows about 22 inches apart on farmland where irrigation assures ample moisture. During early-growing they are thinned, hoed and cultivated. Much of this work is done by hand, but harvesting is a modern task. Beets are dug by machines, topped by hand and loaded by machines.

Travelling Church On The Move

SHERRIDON, Man.—Sheridon's travelling Anglican church is on the move again. Few churches have had such an interesting history as St. Simon's.

Now, new foundations have been poured for the building at Lynn Lake, new copper-nickel town 120 miles north of here. The church will be sledged over frozen lakes and muskeg after freeze-up this winter.

Last winter 72 houses were hauled to Lynn Lake by caterpillar tractors—one of the biggest freight movements in Canadian history. All of Sherridon eventually will be moved there.

The original St. Simon's church at one time stood halfway between Sherridon and the nearby town of Cold Water. It was built to serve both settlements.

A Greek Orthodox church was built at Cold Water. When it closed, the rectory "willed" to the Anglican parish, was moved and attached to St. Simon's chapel.

Later the joint building was moved to Sherridon and another structure, popularly reported to have been occupied by a bootlegger, was sandwiched into the project in the form of a gusset.

Rev. John Patrick, the rector, a familiar figure in northern settlements where he flies his own aircraft, enlisted the interest of bush pilots and prospectors in the little church. The results were spectacular.

Hap Gilbert, a Herb Lake prospector, presented a bell to the church. It came from a locomotive once operated by his father. St. Simon's church in Toronto contributed the present altar. Sherridon residents built furniture.

Someone sent in a shining railway lamp of ancient vintage which was used as a lighting fixture. Tourists found the completed church an excellent photography subject.

Mr. Patrick has used a space under the building as storage for spare aircraft parts.

Patterns

Easy To Memorize

7012

by Alice Brooks

For that very new Baby, make this sweet set! Rows of long double crochet and single crochet alternate in two colors. Do it in two pastels or white and color!

QUICK! EASY! Jacket, cap, booties one piece each! Pattern 7012: crochet directions.

To obtain this pattern send twenty-five cents in coins (stamps cannot be accepted) to:

Household Arts Department,
Winnipeg Newspaper Union,
60 Front Street W., Toronto.
Be sure to write plainly your Name, Address and Pattern Number.

Exciting! Our 1952 edition of Alice Brooks Needlecraft Book! Brimful of new ideas, it's only twenty-five cents. NINETY-ONE illustrations of patterns of your favorite needlecraft designs, plus SIX easy-to-do patterns printed right in the book.

ANSWERS TO QUICK QUIZ

ANSWERS: 5. Two hundred million dollars. 3. 1553-1603. 1. Brazil. \$21 million worth last year. 4. More than 4 times, from \$2,447 million to \$10,400 million. 2. Over \$10 million. (Material supplied by the editors of Quick Canadian Facts, the hand-book of facts about Canada.)

Quick Canadian Quiz

1. What country supplies most of Canada's coffee?
2. Last year did it cost \$4 million, \$7 million, \$10 million to run the CBC?
3. Queen Elizabeth I lived when?
4. By how much did retail buying in Canada increase from 1939 to 1951?
5. How much will business invest in order to bring out Ungava's iron ore?

::: APPETIZING RECIPES :::

The Molasses Sponge Cake, upper left, bedecked with fluffy white frosting and colorful little gumdrops will make a tasty treat for Sunday's dinner, or when you entertain. The rich Currant Cake on the right needs no icing—just sprinkle it with powdered sugar and serve to an appreciative family!

MOLASSES SPONGE CAKE

One cup of sifted cake flour, 1/2 tsp. salt, 5 eggs, separated, 1/2 cup sugar, 1/4 cup cooking molasses, 1 1/2 tsp. of grated lemon rind, 2 tsp. lemon juice.

Sift flour and salt. Beat yolks until thick and lemon-colored, then gradually beat in sugar and molasses and beat for three minutes. Add lemon rind, juice, then the flour mixture, a little at a time, mixing after each addition until smooth. When all

flour has been added, beat until light and fluffy. Beat egg whites until stiff and in peaks, but not dry then fold into batter and pour into 9-inch, ungreased tubepan. Bake 45 minutes, then turn pan upside down on wire cooler and if it hasn't dropped out when cold, loosen from sides. Ice with white frosting and decorate with nuts or raisins or gumdrops.

CURRANT CAKE

Three quarters of a cup butter, 1/2 tsp. salt, 1 tsp. soda, 1

tsp. cinnamon, 1 tsp. nutmeg, 2 cups cooking molasses, 2 eggs, unbeaten, 3 1/2 cups sifted flour, 1 cup milk, 1 cup currants.

Heat oven to 325 degrees F. (moderately slow). Cream together first five ingredients. Blend in molasses. Stir in 1 cup of the flour. Beat in eggs one at a time. Add remaining flour alternately with milk. Stir in currants. Bake 1 1/2 hours in a well-greased, lightly floured, 10-inch tube pan. When cool sprinkle with powdered sugar.

Villagers To Fight Church Ruling Opposing Angel Over Girl's Grave

CHICHESTER, England.—Villagers at nearby Hurst Green plan to fight an ecclesiastical court ruling forbidding Mr. and Mrs. Ernest Reese to build a marble angel statue over their daughter's grave.

The memorial was intended for nine-year-old Kathleen Reese. But Kenneth Mead MacMorran, lay chancellor of the Church of England's Chichester diocese, refused to let the parents erect it.

"The one thing you don't become when you die is an angel," he told Mr. and Mrs. Reese.

The people of Hurst Green, led by Kathleen's mother, started drafting a petition to the Bishop of Chichester, Rt. Rev. Geoffrey Bell, asking him to reverse MacMorran's decision.

"It is strange there should be all this trouble over a little girl's grave

and we are determined to fight the court's decision," said Mr. Reese.

Said Bishop Bell: "There's nothing I could do about a petition. That would be for ecclesiastical court itself to consider."

The local vicar, Rev. Charles Bell, refused to comment on the petition. The Reeses applied to the ecclesiastical court for permission to erect the statue after he objected to it.

Church of England dignitaries have rebuked MacMorran, 69-year-old lawyer who administers legal affairs of the diocese, for his statement "You don't become an angel when you die."

But they agreed he was probably right to ban the angel from the Hurst Green churchyard because it would be "rather primitive and misleading."

ODDITIES In The News

Miles Baker of Shelby, N.C., cotton mill superintendent, is absentminded, and glad of it. When he went to a mill substitution to put the switch back after power was interrupted during a storm he found he had left the key at the office. A few minutes after he turned back, the switch blew up.

Elk Grove, California state trappers finally caught a three-legged coyote that had killed 20 lambs in 30 days. The animal apparently came out of the hills into this valley town because its crippled condition made it impossible to compete with other predatory animals in the wilds.

Despite his blindness, 66-year-old George Serrant of New Bedford, Mass., maintains his garden. He can identify any garden plant simply by touch.

Astonished city officials of Paris sent out for more champagne after delegates to the Congress Against Alcoholism drank up five cases at a civic reception.

Helpful Hints

The tearing of a window shade from the roller can be prevented by removing the tacks that hold it to the roller and substituting a strip of adhesive tape.

It is well to remember that two teaspoons of cream of tartar and one scant teaspoon of baking soda are equal to three teaspoons of baking powder.

Better put down raisins on your shopping list for things you'll need for school lunches. The small packages go over big with the kids and supply them with a good source of quick energy.

Do not knot the end of the thread when basting. Merely start by making two stitches in the same place. This will hold the end of the thread sufficiently and when the basting is pulled out, there will be no forgotten knot to make holes along the lines of basting.

N.Z. POPULATION 2,000,000
WELLINGTON, N.Z. — Officials were happy to see the arrival of 588 new settlers aboard the immigrant ship Hobson. They boosted New Zealand's population to slightly over the 2,000,000 mark.

Canadian Fashion

THE JUMPER, popular for fall, is shown, (above), in a black and white diagonally striped corduroy. It was worn with a double-breasted weskit and black jersey blouse made with the new "stovepipe" neckline.

Smile Of The Week

GOT A LAUGH
The wedding presents were on view. Displayed in a prominent position was a check for \$1,000, the gift of the bride's father.
"I say, who is that chap laughing at your father's check?" exclaimed the bridegroom, feeling annoyed.
"Oh, that's the bank manager!" said the bride.

Each year insects destroy enough United States wheat in storage to fill the wheat needs of 16,000,000 people.

3005

OUR COMPLETE SHORT STORY —

... And She Be Fair

By DAY RUSSELL

THE grandmotherly lady was not a person you could ignore. There was a serenity about her that was almost a kind of radiance. She sat, her back-gloved hands crossed on her lap, in the corner of one of the heavy oak double-sided benches that hyphenated the length of the art gallery. She gazed quietly at one picture.

The gallery was exhibiting the collection of Harvey J. Collinson, the city's wealthiest citizen, lately deceased. He had collected art, at first with zest and later with discrimination, and he had bequeathed his collection to the city. Now it was being exhibited, old masters and modern, each in its separate rooms, and the rest, a mixed bag of unknowns, in this gallery where the old lady sat.

She had been the first in on this weekday morning but now students were coming in. Two of the older ones, a boy and a girl, slid down into the bench where the old lady sat.

"They should have thrown out some of the stuff in this room too." The boy was at the arrogant stage of his convictions. "Sweet stuff."

"And She Be Fair", read the girl aloud. "Vivian Gray. Ever heard of him?"

"Never," said the boy. "Didn't they just love to throw a young girl down on a bank of flowers and paint her all sweetness and light?"

"But she is lovely," said the girl slowly.

The boy nodded with superiority. "Idealized sentiment. Bet she was never like that."

"But she was!" They started as the old lady turned to them. "You see, I knew her."

Awkwardly, to save fumbling for a reply, they turned to look at the picture again. It was a huge canvas in which a life-sized girl, young and lovely, lay in a patch of mottled sunlight against the shadow of a woodland glade.

"Look at the perfect detail," said the girl.

"Detail doesn't count. Might just as well have a color photograph," said the boy.

"But, no," said the old lady, quietly. "No! Can't you see? She is in love."

"Yes," breathed the girl. "Did you know the artist too?"

"Yes. Very well. He painted that picture fifty years ago . . . in this city."

The boy spoke. "But nobody ever heard of him."

"It was harder for artists in those days. There was no interest in art."

"No interest?" said the boy quickly. "Collinson bought that picture and I'll bet he paid a pretty price for it."

"Twenty dollars," said the old lady sadly. "That was the first picture he bought, that started his collection. He had to buy others . . . more and more to make that girl seem smaller and less disturbing."

There was a puzzled expression on the girl's face. "But I don't see . . ."

The old lady went on. "In a way it was that picture that gave this collection to the city."

"A million dollar collection," said the boy.

"And it was because of that girl Harvey Collinson bought the picture. So in a way she gave birth to this collection." The old lady seemed to search her mind for a date. "1893", she said softly. "That was the year the artist came back from Paris. He

had been left some money and went to Paris and stayed there until his money was gone. He and Harvey Collinson had been at school together but Harvey had left school at fourteen to work in his father's machine shop. By the time the artist returned from Paris, Harvey had taken over the business and moved into a brick building. He was full of ambition. He was also engaged to the girl."

The girl whispered, "That is why she looks so happy."

"No," said the old lady. "When the artist returned she broke the engagement. Harvey wouldn't let her go without a fight. He said he would give her everything she could want. He asked what the artist could give her."

"What did the artist say?" The girl hung on the reply.

"He laughed and said, 'I will paint her picture and the one thing every woman is afraid to lose, her youth.'"

The old lady lifted her hand as if to show the two young people how true those words had been. "Then he quoted that line of Keats . . . 'Forever wilt thou love and she be fair.'"

The boy leaned forward. "For ever she'll be fair! He was right. There is the girl, the model, still young, still perfect, while the artist is forgotten and Collinson is dead."

The old lady waited a moment before she spoke. "Harvey Collinson was angry. He said she was a fool to marry an artist . . . that painting her wouldn't pay their bills. Who did they suppose would buy it?"

"Not you," said the artist. "We'd have to be starving before I'd sell it to you."

The girl whispered the next words. "And he paid only twenty dollars for it?"

The old lady lifted her hand again. "It doesn't seem to matter now, does it?"

The boy frowned. "And he never painted another picture anybody ever heard of . . . I don't understand. How could he paint like that and yet nobody ever heard of him as a painter?"

"Sometimes," said the old lady. "I think that fame and love are like oil and water. They do not go together." She gathered her coat about her and rose. She stood for a moment before the picture. As she turned to go she looked down at the young lovers.

"But we were very happy."

Level Land

Liana Schleser of East Culee was visiting at the home of Mr. and Mrs. Jacob Gimbel.

Amaryllis Gramms, Geraldine Roth and Bobby Huether, all of Canadian Union College, were with their parents over the weekend.

Members of the S. D. A. Dorcas were working on their quilts Saturday night.

Marjorie Leiske of Canadian Union College had a short visit with her parents Nov. 6, returning after the wedding.

Mr. and Mrs. Bill Wetzel and Norma of Bentley and Mrs. C. Leiske of Lacombe visited with the Leiskes of this district, took in the wedding and left for home Friday.

Mrs. Edwin Lang of Calgary visited in this district for a few days.

50,000 war orphans are now wandering around hungry, alone, helpless, bewildered and lost in Korea.

The S.D.A. Dorcas Society of Beiseker and Level Land district want used clothing to send overseas. If you can, do it soon. Millions of people have been uprooted by this war. See or phone Mrs. Jacob Gimbel R1009 or Mrs. John Leiske R1013.

Mrs. Ethel Gramms, Level Land teacher, brought 15 of her students to the annual convention of the Calgary district of the Alberta Teachers' Association and conducted a science lesson to supplement her lecture "Science Can be Taught." She had on display all kinds of things which she uses in her regular classroom.

JUNIOR CLUB NOTES

A successful Achievement Day and 4H Junior Seed Fair was held in Beiseker Memorial Hall Oct. 23 with a fairly good attendance. The event started off with the club members taking part in a grain judging competition. The exhibits were judged by A.M. Wilson, field crops commissioner and Robert Pharis, supervisor of crop improvement assisted by the two boys who are to represent Alberta at the Toronto Royal Winter Fair. Top honors for the Beiseker Club went to Gregory Schmaltz 1st, Lloyd Berreth 2nd and Gerald Berreth 3rd.

Tops for Acme was Don Kostrosky with Del Bates 2nd, Jim Bates 3rd and Lyle Haining 4th.

Marjorie Leiske led the Carbon Club with Morley Buyer 2nd and Phyllis Schuler 3rd.

In the Forage Achievement held in conjunction with the grain show, Minnie Howe of Swalwell placed first and Daunavon Buyer of Carbon was 2nd.

The Thematic Display "How to Make a Good Community Better" were judged by Ed Ness.

Mrs. Henry Borgardt was visiting a few days at the home of Mr. and Mrs. John Leiske and the S.D.A. Church on Nov. 8.

Joe Trenchuk of Edmonton was visiting in this district for a few days.

Mr. and Mrs. Harold Wagner of Walla Walla, Wash. were visiting for a few days with the Huethers, also took in the Huether-Sell wedding.

Mr. and Mrs. E. Littman and Miss Ruth Wilkie of Leduc were visiting in the district with Mr. and Mrs. Glen Triebwasser for a few days.

Alberta Pool field man and Robert Pharis. Top place went to the Aime Club with Carbon 2nd and Beiseker 3rd.

Speakers were: Mayor L. L. Schmaltz who welcomed everyone to Beiseker; A.M. Wilson, R. Pharis; Stan Pettem, D.A.; E.F. Ness; Norman Bell; Miss Lorraine Shatz, Dist. Home Ec.; Ken Boake and Gregory Schmaltz.

The day was interesting and educational. The club members and leaders spend a lot of time and effort to make it so. The one thing that was lacking was a number of parents. We would like to see a little more support from this source. Come on, parents, let's support your boys.

The Drumheller Annual Dist. Grain Show was held on the 25th Wheat exhibits were judged from the Acme. Beiseker, Carbon, Trochu, Three Hills, Rockyford and Drumheller Clubs. Ricky Sharpe of Drum. won the grand championship; Ron Leonard of Drum. was awarded the

"Art Bates" leader of Acme Wheat Club, acted as chairman. Speakers were: Geo. Carter, Drum. Dist. Agric. Society; N.F. Dist. Ag., Calgary; Stan. Pettem, Dist. Ag., Drum.; Les Usher, assistant supervisor of junior activities; R. Pharis and E.F. Ness.

Dr. P. J. Greaney, Director, Line Elevators Farm Service, Winnipeg, Manitoba. sponsored by the following companies: Federal, Alberta Pacific, Pioneer, Canadian Consolidated, Patterson, McCabe, Parrish & Heimbecker, Inter-Ocean, Independent, Ellison Milling, Canada West and Quaker Oats.

Stored Grain Insect Warning

A number of serious outbreaks of insects in farm-stored grain have been reported recently in Western Canada. It is now evident that, in the months ahead, insects may easily become one of the most important hazards to the safe storage of grain on the farm. It will pay any farmer to check all his stored grain closely this Fall for grain-eating insects.

Safety Rules. Wherever grain is stored, the basic rule for keeping down insects is to keep the grain dry, cool, and as free as possible from broken kernels, dust and dirt. Low moisture content is the best single protection against insect damage. However, other things besides moisture content make frequent examination of farm-stored grain advisable. For instance, one load of grain of higher moisture content going into a bin of very dry grain forms a layer where insects can live and multiply. Furthermore, several kinds of grain insects will survive and reproduce in relatively dry grain if it contains cracked or damaged kernels for them to feed on. Some insects can, of course, develop in low moisture grain provided the temperature of the grain is sufficiently high. The higher the grain temperature, up to 95° F., the lower the moisture content must be for safe storage.

Watch That Grain. During the next few weeks it will pay farmers to check all their stored grain for moisture content and temperature. Even the grain you consider safe because of its low moisture content should be examined frequently this Fall. Winter weather will, of course, cool the grain to levels where insects are inactive. The early detection of any dangerous insect infestation in your grain will enable you to apply effective control measures before any serious loss occurs. Don't forget that early "clean-up" measures will save you time and money. Any farmer who finds a dangerous insect infestation in his stored grain should report the matter at once to his local Agricultural Representative, or to the Stored Product Insect Laboratory, Winnipeg.

MARRIED

PEARCY—RITCHIE

A quiet double ring wedding ceremony was held recently at the home of the bridegroom's mother in Grande Prairie, when Miss Irene Muriel Ritchie, daughter of Mr. and Mrs. T.H. Ritchie of High River exchanged nuptial vows with Mr. Gordon Loyst Percy, son of Mrs. Laura E. Percy and the late Mr. W.S. Percy. Rev. H.C. Pritchard read the service in which the bride was given in marriage by Mr. Arthur Longair.

Mrs. Arthur Longair attended the bride and Mr. Stanley Percy attended the bridegroom.

The bridal couple will reside in Grande Prairie.

"A very valuable citizen"

When a bank manager was transferred recently a group of citizens wrote the bank in tribute to his sense of public service:

"During the time he was here, we found him to be a very valuable citizen. He always took a deep interest in our community, so we feel we have lost a valuable asset. However, we feel sure that his replacement will be made with a man of similar calibre."

A bank man, by the very nature of his work, becomes part of the life around him. During his training in various branches, and as he takes on growing responsibilities, he learns more and more about people and how his bank can help them. And he brings to his community his personal readiness to serve in any way he can.

MUNICIPAL ASSISTANCE
TAXPAYER: Do I share in the revenues of the Alberta Government?
DEPT. OF MUNICIPAL AFFAIRS: Yes, you do! Approximately 40% of the total expenditure on income account will be distributed in the form of municipal assistance this year.

FACTS YOU SHOULD KNOW:

1. All Albertans will benefit from the \$29,000,000 in direct and indirect grants to municipalities this year.
2. The province pays the entire or a major portion of social services such as Old Age and Blind Pensions, Mothers' Allowance, Indigent Relief and Child Welfare.
3. The province makes direct grants for roads and bridges, schools and hospitals.
4. The province will compensate any municipality which reduces the mill rate up to a maximum of three mills. This amounts to a refund of taxes direct to the taxpayer and will cost the province nearly \$2,800,000 in 1952.
5. Through the Self-Liquidating Projects Act, municipalities have been able to borrow money at a low rate of interest to finance such installations as waterworks and sewerage projects.

GOVERNMENT OF THE
PROVINCE OF ALBERTA
